Macdonald Bridge closure to replace approach spans bearings

(Dartmouth, NS) - Halifax Harbour Bridges (HHB) advises motorists that the road deck of the Macdonald Bridge will be closed from 7:00pm, Saturday, May 9 until 5:30am, Monday, May 11.

The closure is required to replace two bearings on one of the bridge piers of the Macdonald Bridge, located on the approach span on the Halifax side of the bridge.

This project is not related to the Big Lift. The work was originally scheduled to take place during one of the overnight closures taking place for the Big Lift. However, through the planning it was determined a 10 ½ hour closure was not sufficient to complete the necessary work.

The bike lane and sidewalk will remain open.

With almost 34 million crossings each year, HHB's mission is to provide safe, efficient and reliable cross harbour transportation infrastructure at an appropriate cost.
